Creditreform International Monitoring

Early risk identification through monitoring

Early Risk identification through monitoring

When the economic situation of an international partner changes, you as their business partner in Germany, may not become immediately aware of any changes to their solvency. Take precautions. With Creditreform International Monitoring it becomes child's play to monitor all your major key customers and suppliers, by promptly receiving information on relevant changes.

Areas of use

- Early risk identification through the delivery of supplements
- Monitoring of individual customers and suppliers, or entire portfolios
- Ongoing master data maintenance

Solution

- Constant monitoring of key customers and suppliers in international business
- Early risk identification through the permanent monitoring of solvency-relevant parameters
- Straightforward monitoring of continuing obligations
- Quality optimization for your customer- and supplier-management activities
- Monitoring of company master data, communication data, management and authorized representatives
- Supplement to International Commercial Report
- Minimum 12-month contract term, followed by one-month termination period
- Available in English, German and French
